Winston-Salem, NC 27107

Dear Mr. Waters:

Boardman Petroleum, Inc. received notification of the pending No Further Action for the above referenced site on March 25, 1999, from S&ME. The letter was dated March 9, 1999 and addressed to Linda M. King and Beenie Rowland. We had no previous notification on file relating to this site.

As an interested party Boardman Petroleum, Inc. would like to request that issuance of the No Further Action be postponed until we have had the opportunity to review the report. We would like to request a stay for approximately forty-five days. Immediately upon our review, we will notify the department that we either have no objections or provide our comments.

We would like to confirm the groundwater use in the area. Since the certified letter dated January 29, 1999 from the NCDER specifically states that groundwater has not been restored to the level of the standard or interim standard established in 15A NCAC 2L .0202 and that the groundwater within the area of contamination or within the area the contamination is expected to migrate, we believe it important that we the opportunity to confirm the status of our water supply. In addition, we would like to verify groundwater direction, the extent of the plume, levels of contamination, and evaluate the potential for migration to our property.

We have placed an order for a copy of the report with the consultant, S&ME, dependent upon their client's authorization. If S&ME's client refuses, we will need to send someone to your office from Augusta, Georgia to review the report.

We appreciate your attention to this matter.

Sincerely,

Nan Miller
